

MM150

Mobile In-Line Sprayer

Made in the USA

Features:

- ▷ Optional Brush Unit prepares substrates for perfect coating
- ▷ Air Logic Controller automatically triggers spray guns on and off
- ▷ Control Panel for adjustment of turning speed and emergency stop
- ▷ Pneumatic Control Panel provides full control of spraying operations
- ▷ Easy Feeder Fence and Pinch Roller keep substrates precisely on track
- ▷ Casters provide mobility for easy storage when machine is not in use
- ▷ Overspray Tray collects overspray for reuse or recycling
- ▷ 5 gallon coating container capacity
- ▷ Three Spraying Arms ready for your choice of spray gun system

Advantages:

- ▷ Affordable
- ▷ Easy to use
- ▷ Precisely timed spraying
- ▷ Requires only a regular power outlet
- ▷ Low operating costs
- ▷ Compact and mobile for easy storage

Affordable and High Performance Moulding Machine

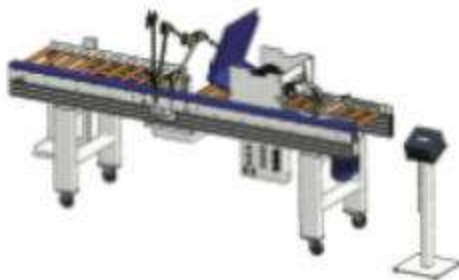

Give your profiles the finishing touch they deserve with the affordable, high-performing MM150. The high performance coating capability of the MM150 increases production and lowers operating costs.

Save and Convenient

Positioned in the spraying zone of a functional spray booth, the booth's face air velocity offers sufficient protection from non-captured overspray for both booth operator and surrounding area. Its convenient Rollway Casters make transport to and from your spraying zone an easy task.

Efficient

Thanks to the Air Logic Controller, the MM150's spray guns are triggered on demand so they will never spray longer than needed. This timely gun triggering in combination with accurate and efficient gun positioning angles makes the MM150 up to 30% more efficient than conventional hand spraying.

Feed Speed:	30 to 150 fpm
Spray Guns:	up to 3
Working Width:	up to 8"
Min. Working Length:	30"
Dimensions:	88" L x 30" W x 59" H
Electrical:	6A @ 115V/1PH/60 Hz

MM150

Accessories

Brush Unit

The MM150's Brush Unit gently brushes off small fibers from the wood surface without generating new ones and smooths the surface for improved topcoat adherence. All this and the easy replacement of the abrasive brush strips make this denibber a must-have for your MM150.

Spray System

The MM150 is ready to be equipped with three spray guns and a pump of your choice. A powerful high-pressure or membrane pump transports coating to the spray guns. Quick-Adjust Arms provide total control over the spraying angle while the guns atomize the fluids for consistent coating transfer and precise spraying.

Stain Wiping Unit

Create a more vivid finishing with the MM150's Wiping Unit. Its soft brush wipes away excess stain to bring out the wood's natural grain. The Wiping Unit assures to be an accessory you will not want to miss, making your MM150 take care of the complete finishing process.

Roll-On Exhaust Unit

No stationary spray booth is needed with the MM150's Roll-On Exhaust Unit. Aided by a fan, the Roll-On Exhaust Unit filters overspray not captured in the overspray tray making your shop a safe and clean working environment.

Special Sizes & Configuration

Be completely flexible with the MM150's various special size conveyors. Upon request your machine can be equipped with conveyors that handle multiple sanding units, extra large or extra small substrates.

Tailor-Made for You

To meet your specific finishing needs, we have developed a variety of accessories for the MM150. Each machine is custom-made to match your personal preferences.
