

AVX Pro

The best automatic Airmix® spray gun
to enhance your finishing,
productivity and profitability.

- ✓ Up to 5% more paint savings
- ✓ Up to 30 minutes of recovered production time per day
- ✓ 30% lighter design at just 580g
- ✓ Fast-closing 70ms trigger to help reduce paint waste
- ✓ Integrated NFC tag for IoT traceability, a first for SAMES

DESIGNED TO REDUCE WASTE

Advanced internal fluid technology and optimized atomization help the **AVX Pro** deliver a finer, more consistent spray pattern while using less material. Its innovative internal design improves paint fluidity at the nozzle, allowing excellent atomization with lower air pressure to help reduce overspray and improve transfer efficiency.

By directing more material onto the target surface instead of into the surrounding air, the **AVX Pro** helps manufacturers maximize paint usage while reducing cleanup, filter loading, and waste disposal costs. The result is a cleaner, more efficient finishing process with improved consistency and long-term cost savings.

FASTER CHANGEOVERS & LESS DOWNTIME

The **AVX Pro** is built to simplify operation and maintenance. Features like the indexed aircap system and quick disconnect functionality help operators reduce setup and cleaning time, supporting faster changeovers and increased production uptime throughout the day.

NEXT GENERATION AIRMIX® PERFORMANCE

The **SAMES AVX Pro** automatic Airmix® spray gun is engineered to help manufacturers improve transfer efficiency, reduce overspray, and increase productivity. Designed for modern finishing operations, the **AVX Pro** delivers high-quality finish results while helping reduce paint consumption and operating costs.

BUILT FOR PRODUCTIVITY

With a lightweight, compact design and fast-closing gun technology, the **AVX Pro** helps improve line efficiency without sacrificing finish quality. Its streamlined design supports smoother operation, reduced stress on automated systems, and improved consistency across demanding production environments.

SEAMLESS INTEGRATION

Designed for compatibility with many existing Airmix® setups, the **AVX Pro** makes upgrading simple. Whether used in wood, metal, or industrial finishing applications, the **AVX Pro** delivers reliable performance, lower operating costs, and the proven advantages of SAMES Airmix® technology.

UPGRADE
YOUR FINISH.
**UPGRADE
YOUR FUTURE.**

✓ Improved Finish Quality

Optimized fluid and air design creates finer atomization, reducing overspray and improving transfer efficiency.

✓ Increased Productivity

A patented indexed aircap system enables fast, repeatable positioning after cleaning, helping reduce restart time and support higher production uptime.

✓ Faster Maintenance

A new quick-disconnect design simplifies servicing and minimizes downtime.

✓ Smart Connectivity

Integrated NFC technology provides quick access to documentation and supports future IoT connectivity and traceability initiatives.

✓ Reduced Mechanical Load

Its lighter design helps reduce stress on flatline equipment, reciprocators, and robotic systems.

✓ Seamless Integration

The AVX Pro maintains the same mounting points, connections, and TCP as the AVX, enabling easy replacement with minimal disruption.
